

Effortless excellence

GLEN India takes another step towards making the cooking experience a real pleasure, with the launch of its new **Next Generation** high quality Lifestyle Food Processor that makes pre-cooking tasks easy and convenient.

GLEN India, is a leading Lifestyle Quality Appliances company, marketing top-of-the-line premium kitchen & home appliances for the modern cosmopolitan Indian household. With all the precision inherent of European manufacturing tradition, Glen products are synonymous with technical perfection and outstanding function and design.

The new Glen food processor GL 4052 is a versatile kitchen machine designed to make working in the kitchen fast, convenient and pleasant. It is fitted with a powerful 700 W motor with high torque to effortlessly perform toughest functions. It takes care of all your pre-cooking tasks making them simple and convenient. It chips, chops, slices, shreds, whisks, kneads, shreds coconut and does much much more. It is specially designed with 30% more reduction in the RPM on the FP side for better processing of the food.

Moreover the smart mixer grinder attachment, with three jars, takes care of all blending, dry & wet grinding tasks and prepares tongue tickling chutneys too.

You can also Prepare fresh & healthy fruit & vegetable juices for friends and family with the juice extractor and the new design citrus juicer.

Combining the best of looks with the most intelligent technology and innovative features the smart new food processor is designed to produce the most exotic results with the utmost of convenience.

Spill-proof bowl A large capacity revolutionary new bowl, designed without a centre tube. It has a specially designed spindle, which gets locked in the bowl and seals it perfectly. This prevents overflow and spillage of liquids while working or while removing the processing blades. The specially designed unbreakable polycarbonate pusher works as a measuring cup also. For maximum safety positive locking for FP Bowl Lid is provided to avoid opening while processing

Multi-flow liquidizer The new liquidiser now comes with a unique design multi-flow lid. No need to remove the lid, simply slide the pointer near the handle to adjust to the three possible pouring settings 'open', 'sieve' or closed'. Choose your shakes as you like them, with or without ice.

Low RPM citrus press The RPM of this specially designed citrus press has been reduced to a minimum for a convenient operation and better juicing of citrus fruits. Moreover the cone is specially positioned at an off-centre position to allow for more space and a better grip while juicing.

Easily changeable blades A single disc with easy to fit interchangeable blades for shredding, slicing, chipping and grating. For maximum safety during handling, all these blades are mounted in a special plastic body. No sharp edges, no difficult locks, Safety and convenience at its best.

Food Grade Steel All the stainless steel parts like jars and blades are made of Food Grade Stainless Steel 304. This keeps the food quality & flavor intact and does not effect the food even when the jar gets heated up specially in case of dry grinding.

Compact Storage A compact rack which houses almost all the accessories conveniently. Moreover it fits comfortably inside the bowl for a convenient storage and a minimum shelf space.

Centralised Feeder Tube In the food processor GL 4052 the feeder tube is designed in centre of the machine. This helps in better balancing and thereby better processing of the food.

The MRP of this Food processor is Rs. 7990/-.
